Shelter
You may need to take shelter for severe weather (most common) or a hazardous materials release.

During an incident requiring individuals to take shelter, all building occupants should immediately move to the designated Tornado Shelter Areas in the building. If unable to safely move to the designated shelter area, seek shelter in a windowless interior room or hallway on the lowest floor of the building.

Residents and other building occupants should take shelter in the lowest level of their respective wing. Avoid standing near windows, exterior walls, and doors made of glass.

Evacuation
If you need to evacuate the building—for a fire, bomb threat, gas leak, or other event—all building occupants should immediately move to the nearest EXIT. Once outside, proceed to the designated Evacuation Assembly Area. If unable to safely move to the designated Evacuation Assembly Area, contact your RA to let them know you are safe and inform them of your whereabouts.

Persons with mobility impairments who are unable to safely exit the building should be moved to a designated Area of Refuge (also called a Fire Refuge Area) and await assistance from emergency responders. Residents and other building occupants should congregate to Parking Lot 27, northwest of Clark Hall.
