Shelter
You may need to take shelter for severe weather (most common) or a hazardous materials release.

During an incident requiring individuals to take shelter, all building occupants should immediately move to the designated Tornado Shelter Areas in the building. If unable to safely move to the designated shelter area, seek shelter in a windowless interior room or hallway on the lowest floor of the building.

All building occupants should take shelter the concourse area below seating. Event staff will be present to ensure all occupants are relocated to the closest safe area. Avoid standing near windows, exterior walls, and doors made of glass.

Evacuation
If you need to evacuate the building—for a fire, bomb threat, gas leak, or other event—all building occupants should immediately move to the nearest EXIT. Once outside, proceed to the designated Evacuation Assembly Area. If unable to safely move to the designated assembly area, contact one or more members of your department or unit to let them know you are safe and your whereabouts.

Persons with mobility impairments who are unable to safely exit the building should be moved to a designated Area of Refuge (also called a Fire Refuge Area) and await assistance from emergency responders.

All building occupants should immediately evacuate the stadium in an orderly manner. Event staff will ensure the premises is evacuated safely.

For more information on what to do in a specific emergency situation, refer to the UNT Emergency Guidelines on www.emergency.unt.edu or the Mean Green Ready app. Call 911 in an emergency!
